

# Guidelines for People Who Are Fully Vaccinated

## Fully Vaccinated Qualification:

- 2 weeks after the second dose of the two-dose Pfizer or Moderna vaccines, or
- 2 weeks after the single-dose Johnson & Johnson's Janssen vaccine.

## General Activities:

- You can resume activities that you did prior to the pandemic.
- You can resume activities without wearing a mask or staying 6 feet apart, except where required by federal, state, local, tribal, or territorial laws, rules, and regulations, including local business and workplace guidance.
- You will still need to follow guidance at your workplace and local businesses.

## Travel:

- If you travel in the United States, you do not need to get tested before or after travel nor self-quarantine after travel.
- You need to pay close attention to the situation at your international destination before traveling outside the United States.
  - You do NOT need to get tested before leaving the United States unless your destination requires it.
  - You still need to show a negative test result or documentation of recovery from COVID-19 before boarding an international flight to the United States.
  - You should still get tested 3-5 days after international travel.
  - You do NOT need to self-quarantine after arriving in the United States.
- If you travel, you should still take steps to protect yourself and others. You will still be required to wear a mask on planes, buses, trains, and other forms of public transportation traveling into, within, or out of the United States, and in U.S. transportation hubs such as airports and stations. Fully vaccinated international travelers arriving in the United States are still required to get tested within 3 days of their flight (or show documentation of recovery from COVID-19 in the past 3 months) and should still get tested 3-5 days after their trip.

## Precautions and Exposure to COVID-19:

- If you've been around someone who has COVID-19, you do not need to stay away from others nor get tested unless you have symptoms.
  - However, if you live or work in a correctional or detention facility or a homeless shelter and are around someone who has COVID-19, you should still get tested, even if you don't have symptoms.
- You should still watch out for symptoms of COVID-19, especially if you've been around someone who is sick. If you have symptoms of COVID-19, you should get tested and stay home and away from others.
- People who have a condition or are taking medications that weaken the immune system, should talk to their healthcare provider to discuss their activities. They may need to keep taking all precautions to prevent COVID-19.

## What We're Still Learning:

- How effective the vaccines are against variants of the virus that causes COVID-19. Early data show the vaccines may work against some variants but could be less effective against others.
- How well the vaccines protect people with weakened immune systems, including people who take immunosuppressive medications.
- How long COVID-19 vaccines can protect people.

# Choosing Safer Activities

Accessible link: <https://www.cdc.gov/coronavirus/2019-nCoV/daily-life-coping/participate-in-activities.html>

	Unvaccinated People	Examples of Activities	Fully Vaccinated People
		<b>Outdoor</b>	
Safest		Walk, run, wheelchair roll, or bike outdoors with members of your household	
		Attend a small, outdoor gathering with fully vaccinated family and friends	
		Attend a small, outdoor gathering with fully vaccinated and unvaccinated people	
Less Safe		Dine at an outdoor restaurant with friends from multiple households	
Least Safe		Attend a crowded, outdoor event, like a live performance, parade, or sports event	
		<b>Indoor</b>	
Less Safe		Visit a barber or hair salon	
		Go to an uncrowded, indoor shopping center or museum	
		Attend a small, indoor gathering of fully vaccinated and unvaccinated people from multiple households	
Least Safe		Go to an indoor movie theater	
		Attend a full-capacity worship service	
		Sing in an indoor chorus	
		Eat at an indoor restaurant or bar	
		Participate in an indoor, high intensity exercise class	

## Get a COVID-19 vaccine

**Prevention measures not needed**

**Take prevention measures**

Wear a mask, stay 6 feet apart, and wash your hands.

- Safety levels assume the recommended prevention measures are followed, both by the individual and the venue (if applicable).
- CDC cannot provide the specific risk level for every activity in every community. It is important to consider your own personal situation and the risk to you, your family, and your community before venturing out.
